### YUKON BUREAU OF STATISTICS

Yukon Employment May 2014

#### Highlights:

- Yukon's unemployment rate in May 2014 (3.9%) increased by 0.5 percentage points compared to April 2014 (3.4%).
- Compared to April 2014 figures, Yukon's labour force decreased by 200 to 20,500, the number of employed decreased by 200 to 19,700 and the number of unemployed increased by 100 to 800.

\*Nunavut's unemployment rate is available only as an unadjusted estimate.

- Nationally, comparing May 2014 to April 2014 figures, the unemployment rate increased by 0.1 percentage points to 7.0%.
- Compared to April 2014 figures, the labour force in Canada in May 2014 increased by 0.2%, the number of employed increased by 0.1% and the number of unemployed increased by 1.1%.

May 2014	
Yukon Employment	at a Glance
Labour force	20,500
Employed	19,700
Unemployed	800
Unemployment Rate	3.9%
Employment Rate	71.6%

Notes: All figures are based on Statistics Canada's Labour Force Survey (LFS) estimates. Statistics Canada reports LFS figures rounded to the nearest hundred. Therefore, components may not add up to the total.

Analyses and data tables in pages 1 through 4 are based on seasonally adjusted numbers. Unadjusted figures are available on pages 5 through 7.

Seasonally adjusted employment figures are widely used and quoted, as they are considered to be a more accurate picture of the current employment situation than unadjusted figures. Some variables, however, are only available on an unadjusted basis. Comparisons between adjusted and unadjusted figures should not be made. For more information, see <u>definitions on page 8</u>.

### Comparisons with Canada, Provinces and Territories - Snapshot

Employment Rate, May 2014

\*Nunavut's participation rate and employment rate are available only as unadjusted estimates.

The participation rate measures the percent of the population which is working or actively looking for work. Yukon's participation rate in May 2014 was 74.5%, the second-highest in Canada.

Yukon's May employment rate (the percentage of the population which is employed), at 71.6%, was the highest in Canada.

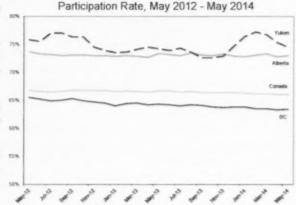

#### Comparisons with Canada and Selected Provinces - Historical

The Labour Force Survey estimates that 74.5% of Yukoners aged 15 years and over were employed or were seeking employment in May 2014.

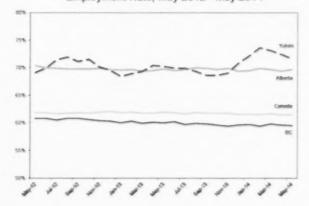

Yukon's participation rate in May 2014 (74.5%) decreased 0.8 percentage points from April 2014 (75.3%) and increased 0.3 percentage points compared to May 2013 (74.2%).

The May 2014 employment rate of 71.6%, decreased 0.8 percentage points from April 2014 (72.4%) and was up 1.4 percentage points compared to May 2013 (70.2%).

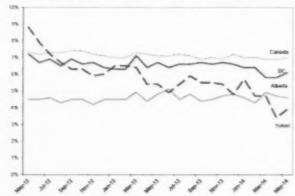

Yukon's labour market in terms of participation rate and employment rate tends to be similar to Alberta's. However, as is often the case with a small population base, our rates show a higher degree of volatility.

Employment Rate, May 2012 - May 2014

Unemployment Rate, May 2012 - May 2014

Unemployment Rate by Age and Sex, May 2012 - May 2014

- Comparing May 2014 to April 2014, the unemployment rate for males aged 15 years and over increased from 5.9% to 6.7% and the rate for males aged 25 years and over remained the same at 5.6%. The rate for females aged 15 years and over increased from 2.9% to 3.9%, and the rate for females aged 25 years and over remained the same at 3.3%.
- Yukon's youth (aged 15-24) unemployment rate went down from 9.5% in April 2014 to 8.3% in May 2014. The youth unemployment rate has consistently been under 10% for the last nine months.

### Employment, Unadjusted, by Full-time/Part-time, May 2014

Full-time employment as a % of all employment Age 15+, May 2012 - May 2014

- Of Yukon's workers aged 15 years and over, 16,800, or 86.2%, were employed full-time in May 2014. This was the second-highest proportion among all other jurisdictions behind the Northwest Territories (88.5%).
- Nationally, 80.8% of employed Canadians worked full-time in May.
- Of employed Yukon males, 89.7% worked fulltime, while 82.7% of employed Yukon females did.
- Comparing May 2014 to April 2014, full-time employment increased by 200 to 16,800, while partime employment remained the same at 2,800.

#### Employment, Unadjusted, by Industry, May 2014

	Both sexes	Males	Females
Total employed	19,500	9,700	9,800
Goods-producing sector	2,900	2,700	200
Forestry, fishing, mining, oil and gas	500	500	×
Construction	1,800	1,700	3
Services-producing sector	16,700	7,000	9,700
Trade	1,900	1,000	800
Transportation and warehousing	1,100	800	300
Finance, insurance, real estate and leasing	1,000	400	600
Professional, scientific and technical services	1,400	500	900
Business, building and other support services	500	300	200
Educational services	1,500	300	1,200
Health care and social assistance	2,800	500	2,300
Information, culture and recreation	1,100	500	600
Accommodation and food services	1,100	600	500
Other services	600	300	300
Public administration	3,700	1,800	1,900

x = suppressed for confidentiality

Notes:

The sum of industries does not equal sector totals as industries with fewer than 500 workers are not shown; row data may not add up to industry totals due to rounding. Industry' refers to the general nature of the business carried out by the employer for whom the LFS respondent works (main job only).

#### Goods- and Services-Producing Sectors, Employment, May 2012 - May 2014

- In May 2014, 16,700, or 85.6% of working Yukoners were employed in the servicesproducing sector, while 2,900, or 14.9% were employed in the goods-producing sector.
- 62.1% of Yukoners working in the goodsproducing sector had jobs in the construction industry; 17.2% in the forestry, fishing, mining, oil and gas industries.
- While females accounted for 58.1% of workers in Yukon's services-producing sector, only 6.9% of the goods-producing sector workers were female.

#### Goods- and services-producing sectors

The goods-producing sector includes industries that are involved in extracting resources directly from the earth (e.g. farming, mining, logging) or processing the resources (e.g. utilities, construction, manufacturing). Yukon's goods-producing sector consists primarily of industries in construction and mining.

The services-producing sector includes industries involved in the provision of services.

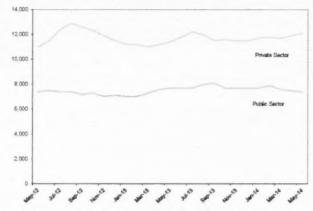

- Employment in Yukon's goods-producing sector peaked in August 2012 with 3,900 workers.
   Employment in the services-producing sector in February 2014 reached 17,100, the record-high level to date.
- Comparing May 2014 to May 2013, employment in the goods-producing sector increased by 200, or 7.4%, while employment in the services-producing sector increased by 300, or 1.8%.

### Public and Private Sectors, Unadjusted, May 2014

	Both sexes	Males	Females
Total Employed	19,500	9,700	9,800
Public employees	7,400	2,900	4,400
Total private sector	12,100	6,700	5,400
Private employees	8,900	4,700	4,200
Self-employed	3,200	2,000	1,200

- In May 2014, 37.9% of working Yukoners were employed by one of the four levels of government in the territory.
- · Of the private sector, 26.4% were self-employed.
- In May 2014, private sector employment increased by 200, or 1.7%, from April 2014, while public sector employment decreased by 100, or 1.3%.

#### Public/Private Sector Employment, May 2012 - May 2014

#### Note:

'Employees' include full-time, part-time, permanent and temporary employees.

'Public employees' are those who work for: a government at the federal, provincial, territorial, municipal, First Nations or other Aboriginal government level; a government service or agency; a Crown corporation; or for a government funded establishment such as schools (including colleges/universities), hospitals and public libraries.

public libranes. 'Private employees' include all employees who work for private firms or businesses.

## **Labour Force Survey Definitions**

**Employment** — Employed persons are those who, during the reference week, did any work for pay or profit, or had a job and were absent from work.

Employment rate — Also referred to as "employment/ population ratio," it is the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, women aged 25 years and over) is the number employed in that group expressed as a percentage of the population for that group.

Goods-Producing Industries — Goods-Producing Industries (or goods sector, or goods industries): includes agriculture, other primary industries (forestry; fishing and trapping; mines, quarries and oil wells), manufacturing, construction and utilities (electric power, gas and water).

**Labour force** — The labour force is the civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed.

Not in the labour force — Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets; that is, they were neither employed nor unemployed.

Participation rate — The participation rate is the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

Reference Week — The reference week is the entire calendar week (from Sunday to Saturday) covered by the Labour Force Survey each month. It is usually the week containing the 15th day of the month. The interviews are conducted during the following week, called the Survey Week, and the labour force status determined is that of the reference week.

Seasonal adjustment — Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those that are caused

by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.

**Self-employed** — There are two broad categories of workers: those who work for others and those who work for themselves, namely, the self-employed. The self-employed includes working owners of incorporated businesses, working owners of unincorporated businesses and other self-employed.

Service-Producing Industries — Service-Producing Industries (or service sector, or service industries): includes trade; transportation and warehousing; finance, insurance, real estate and leasing; professional, scientific and technical services; management, administrative and other support; educational services; health care and social assistance; information, culture and recreation; accommodation and food services; other services; and public administration.

Three-Month Moving Average — All monthly figures for the Territories, whether seasonally adjusted or unadjusted, are three-month moving averages – for example, the March 2011 unemployment rate of 4.5% is actually an average of the unemployment rates for the months of January, February and March. April's unemployment rate became the average of the rates for February, March and April. Because they are three-month moving averages, the Territories' figures are not included in the calculation of Canada's numbers.

**Unemployment** — Unemployed persons are those who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

Unemployment rate — The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.
